DAO DANG HUY

MANUFACTURING ENGINEERING AND OPERATIONS

Manufacturing Operations & Maintenance Leader with 15+ years of experience in FMCG and industrial production environments. Proven in leading multi-shift teams, improving equipment reliability, and driving operational performance across high-speed processing and packaging lines.

Objectives

Contribute operations and maintenance leadership to improve production reliability, team capability, and overall plant performance. Support continuous improvement initiatives in manufacturing operations.

Work experience

May 2018 - Present

Production & Maintenance Supervisor

FrieslandCampina Vietnam (FCV)

FrieslandCampina Vietnam operates under one of the world's largest dairy cooperatives, marketing Dutch Lady, Friso, Yomost, and Fristi across major plants in Binh Duong and Ha Nam, including a FoQus A-certified infant formula facility.

Key Responsibilities:

- Supervise daily production operations across 10 lines (~120 SKUs), ensuring output, quality, safety, and equipment reliability across processing and packaging lines.
- Lead 3 production shifts including operators and 10 maintenance technicians, ensuring manpower allocation, safe operations, and disciplined shopfloor execution.
- Coordinate with Planning and Warehouse to align production schedules, material availability, and line readiness while monitoring KPIs including OEE, downtime, material losses, and labor productivity.
- Work with Production, Maintenance, QA/QC, Planning, and Warehouse teams to resolve operational issues and maintain production targets.

Education

Ho Chi Minh City University of Technology

Sep 2007 - Oct 2010

Major: Engineering – Industrial Maintenance

Classification: Good

Core Competencies

Manufacturing & Production Operations (FMCG)

Equipment Reliability & Breakdown Reduction

Preventive, Predictive & Corrective Maintenance

Maintenance Planning & Spare Parts Management

OEE Improvement & Production Loss Reduction

High-Speed Processing & Packaging Operations

Continuous Improvement (TPM, Kaizen, 5S, PDCA, RCA)

HSE, GMP & ISO Management Systems Compliance

Team Leadership & Multi-Shift Operations Management

Cross-Functional Coordination (Production, QA, Engineering, Planning)

- Serve as technical owner for assigned Tetra Pak filling lines (4 × 180 ml, 1 × 1L), supporting troubleshooting, commissioning support, and technical training.
- Manage annual MRO budget (~VND 10 billion) including spare-part planning, inventory control, and cost optimization.
- Drive continuous improvement initiatives (TPM, Kaizen, 5S, PDCA, RCA) to improve equipment reliability and line efficiency.

Key Achievements:

- Increased line OEE from 75% to 85% (+10 points) through improved maintenance planning and stronger production–maintenance coordination.
- Achieved 99.5% preventive maintenance completion, maintaining PM overdue below 0.05% across 10 production lines.
- Led Tetra Pak packaging conversion (220 ml → 180 ml) on 4 lines, completing the project 40% faster than planned (3 vs. 5 months).
- Stabilized high-speed filling operations by optimizing preventive maintenance practices.
- Achieved Type 1 KPI performance for four consecutive years (2019–2022) and selected as Potential Leader (2023).

Aug 2010 - Apr 2018

Maintenance Team Leader

Vietnam Dairy Products Joint Stock Company (VINAMILK)

Vietnam Dairy Products Joint Stock Company (VINAMILK) is Vietnam's largest dairy manufacturer, operating high-volume FMCG production plants for domestic and export markets.

Key Responsibilities:

- Perform operation and maintenance of production equipment, ensuring compliance with technical standards, safety requirements, and production targets.
- Lead and coordinate line-level maintenance activities to support stable daily production operations.
- Assess equipment condition and execute preventive and corrective maintenance to maintain equipment reliability.
- Coordinate with Operations and Maintenance teams to resolve breakdowns and restore equipment per production schedule.
- Enforce equipment safety, operating procedures, and fire prevention regulations on the shopfloor.

Key Achievements:

- Maintained high equipment availability and supported stable production across assigned lines in a high-volume manufacturing environment.
- Improved coordination between Operations and Maintenance teams, reducing response time during breakdowns and planned maintenance.
- Strengthened operational discipline and safety compliance through consistent adherence to procedures and equipment standards.

SAP (PM Module), AutoCAD, Advanced Excel & PowerPoint

Training & Practical Exposure

2018 - Present

TPM, Kaizen, 5S, PDCA & RCA – Internal continuous improvement programs supporting plant performance and system discipline

2018–2019

Tetra Pak packaging systems technical training – Maintenance, commissioning support, and technical ownership on packaging lines

2013–Present

Preventive maintenance planning & equipment reliability practices – Applied through daily plant operations

2010–Present

Food Safety, HACCP, GMP & HSE practices – On-the-job training in dairy FMCG manufacturing
